

CWS Machine Test- PHP Developer

## Technologies must be used CodeIgniter/Laravel, Ajax and JS (jQuery)

1. Prepare an applicant registration form with the following fields and do.
  - First Name
  - Last Name
  - Phone
  - Email(Unique email only and validate with JQuery validation and server side)
  - Address
  - Dob (should be a calendar and accept only 18+ user's dob)
  - Gender (should be radio button)
  - Resume upload option (Format allowed: pdf, docx and max-size: 2MB)
  - Applicant's photo (Format allowed: jpg, png and max-size: 2MB)- Image must be croppable with any JS package so user can select his/her face only.
  - Must use csrf token(If codeigniter then you must activate the csrf verification in the config file).
2. Show all the applicants data in the list with the help of a data table (Use server side).
3. Add action buttons:
  - View button: For viewing applicant data in modal,
  - Edit button: For editing applicant data(In edit form, prefill all the user data even the gender radio button).
  - Delete button: For deleting applicant data(before deleting an user please confirm).

**PLUS POINTS -**

- Code documentation
- Proper formatting/Indentation
- Using any frontend framework (ReactJS, VueJS, AngularJS)
- Adding Authentication
- Sharing files through github
